To My Congressional Representation or Senator:

I am extremely concerned with the FCC's National Broadband Plan. The plan will have serious negative consequences for consumers living in rural America by calling for broadband speeds of 100 Mbps in urban areas while only supporting 4 Mbps in rural areas through the Connect America Fund.

Without the deployment of broadband with robust speeds, I fear our rural community will fall behind in terms of economic development, educational opportunities, advances in health care, and quality of life. This large disparity is unacceptable, and I urge you to contact the FCC to tell them so. Quality broadband service is fundamental to sustaining and bringing jobs to our community, and the FCC plan should not undercut the investment and commitment Randolph Telephone has already made to deploy broadband service to your constituents.
